

Managing cookies in Safari

Remark

Depending on your browser's version, this procedure may not fully correspond to what you see on your device.

Blocking or allowing cookies

1. Select **Preferences** in the task menu and click on **Security**.

The task menu is located at top right in the Safari window and looks like cogwheel.

2. In the section **Accept cookies**, you can define the general cookie settings to suit your preferences.
 - Always, if you wish always to allow cookies
 - Never, if you wish never to accept cookies
 - Only sites that I visit: if you wish only to accept the specific cookies linked to the site's domain name. If you do that, cookies linked to other domain names will not be allowed.
3. Close the options window, quit Safari and restart.

Deleting cookies

1. Select **Preferences** in the task menu and click on **Security**.

The task menu is located at top right in the Safari window and looks like cogwheel.

2. In the section **Accept cookies**, click on **Show cookies**.
3. To delete all cookies, click on **Remove All**. If you wish to delete individual cookies, select one or more cookies from the list and click on **Remove**.
4. Then click on **Done**.

Managing cookies in Safari Mobile

1. In the menu of your iPhone or iPad click on **Settings** and then on Safari
2. You will then see the options for setting Safari. Go to the **Privacy** tab and in **Accept cookies**, select:
 - Always, if you wish always to allow cookies
 - Never, if you wish never to accept cookies
 - Only sites that I visit: if you wish only to accept specific cookies linked to the domain name of the website. If you do that, cookies linked to other domain names will not be allowed.
