

Alternative Performance Measures⁽¹⁾ full year results 2022

In addition to the financial information prepared in accordance with IFRS as adopted by the EU, Belfius discloses certain Alternative Performance Measures as Belfius believes that these Critical Performance Indicators can help stakeholders and readers of the (semi)-annual report to gain additional insights in Belfius' financial and commercial performances as well as allow them to perform additional comparisons across the sector. While these measures are not reviewed or audited by the statutory auditor, a governance process is in place to ensure consistency and relevance of the measures.

Note, however, that APMs are to be considered as additional disclosures and do not replace the financial information prepared under IFRS, CRR 2 and CRD 5.

Capital Ratios

The regulator has authorised Belfius to apply article 49 of the CRR for the calculation of the capital ratios and hence to include the capital instruments of Belfius Insurance subscribed by Belfius Bank in the total regulatory risk exposure by applying a weighting of 370% (the so-called "Danish Compromise").

- The **CET 1 ratio** presents the ratio between the CET 1 capital and the total regulatory risk exposures.
- The **Tier 1 ratio** presents the ratio between the Tier 1 capital and the total regulatory risk exposures.
- The **total capital ratio** presents the ratio between the total regulatory own funds and the total regulatory risk exposures.

Calculation (in %)	Reference	31/12/21	31/12/22
CET 1 - ratio	Management report/Capital Management	16.4%	16.5%
Tier 1 - ratio	Management report/Capital Management	17.1%	17.3%
Total capital ratio	Management report/Capital Management	19.8%	19.8%

(1) On a regular basis, the APM's will be updated on the website.

Leverage Ratio

The leverage ratio is defined as the Tier 1 capital (the numerator) divided by the leverage exposure amount (the denominator), i.e. balance sheet assets after certain restatements of derivatives, securities financing transactions, off-balance-sheet items and prudential adjustments deducted from the numerator.

Calculation (in %)	Reference	31/12/21	31/12/22
Leverage ratio ⁽¹⁾	Management report/Capital Management	7.1%	6.3%

(1) Note that the allowed Covid-19 relief measure, to exclude part of the exposures to Central Banks, expired on 1 April 2022. The leverage ratio at 31 December 2021 without this relief measure amounted to 5.93%.

Solvency II Ratio

The Solvency II ratio is calculated as the amount of regulatory own funds (AFR) divided by the solvency capital requirement (SCR).

Calculation (in %)	Reference	31/12/21	31/12/22
Solvency II ratio (after dividend)	Management report/Capital Management	190%	193%

Liquidity Coverage Ratio (LCR)

The liquidity coverage ratio forces financial institutions to maintain a sufficient stock of quality liquid assets to withstand a crisis that puts their cash flows under pressure. The assets to hold must be equal to or greater than their net cash outflow over a 30-day period under stress (having at least 100% coverage). The parameters of the stress scenario are defined under Basel III.

Calculation (in millions of EUR or %)	Reference	31/12/21	31/12/22
Stock of quality liquid assets ⁽¹⁾ (A)	Based on the European Commission's Delegated Act on LCR	39,031	44,369
Net cash outflow over a 30-day period ⁽¹⁾ (B)		20,076	25,697
LCR (=A/B)⁽¹⁾		195%	173%

(1) 12 months average.

Net Stable Funding Ratio (NSFR)

The net stable funding ratio is defined as the amount of available stable funding relative to the amount of required stable funding, and is based on Belfius' interpretation of current Basel Committee guidelines, which may change in the future. This ratio should be equal to at least 100% on an on-going basis. "Available stable funding" is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of such stable funding required of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance-sheet (OBS) exposures.

Calculation (in millions of EUR or %)	Reference	31/12/21	31/12/22
Amount of available stable funding (A)		131,146	121,823
Amount of required stable funding (B)		96,111	90,126
NSFR (=A/B)		136%	135%

Net Interest Margin (NIM)

The NIM-ratio is calculated as the sum of quarterly net interest income bank of the last 4 quarters divided by the average of the interest earning assets⁽¹⁾ of the last 4 quarters.

Calculation (in millions of EUR or %)	Reference	2021	2022
Net interest income bank (A) ⁽²⁾	Management report/Financial results	1,623	1,752
Average interest earning assets bank (B) ⁽³⁾	Management report/Financial results	151,821	159,232
NIM (=A/B)		1.07%	1.10%

(1) The interest earnings assets are calculated as the sum of the items I to IV of the balance sheet (under IFRS 9).

(2) A = sum of the NII of the last 12 months

(3) B = last 4 quarters rolling average of the interest earning bank

- loans and advances (from customers) measured at amortised cost;
- debt securities and equity instruments measured at amortised cost and at FV through OCI (excl. participations and equity); and
- guarantees granted.

Return on Normative Regulatory Equity (RoNRE)

The normative regulatory equity is calibrated. The CET1 ratio is set at 13.5%, taking into account the regulatory risk exposures and some CET 1 capital deductions. Return on Normative regulatory equity (RoNRE) is calculated by Belfius as the sum of the last 4 quarters net result as a percentage of the last 5 quarters rolling average RWA * 13.5%.

Calculation (in millions of EUR or %)	Reference	2021	2022
Last 4 quarters Net Income (A)	Management report/Segment reporting	935	975
Last 5 quarters rolling average RWA * 13.5% (B)	Management report/Segment reporting	8,477	8,706
RONRE (=A/B)		11.0%	11.2%

The RoNRE is also calculated for IND and E&E&P based on a similar definition. Please note that during 2022 a refinement of the segmentation occurred. This may implicate that there are some slight reclassifications between the three segments (IND, E&E&P and GC) compared to the published segmented FY 2021 figures.
