Brussels, 3 February 2022

Belfius Bank awarded the title of best Belgian bank for Cash Management and Trade Finance by the international magazine Global Finance

For the second consecutive year, the international magazine Global Finance has awarded Belfius the title of best bank for Cash Management and Trade Finance activities on the Belgian market. This double recognition once again confirms the expertise of Belfius and its real added value for entrepreneurs and companies in our country, both for the daily management of their financial flows and for the processing of their international trade operations and the development of their activities in Belgium and abroad.

Each year, the international magazine Global Finance selects the best financial institutions in 152 countries in various fields, including Cash Management & Treasury services and Trade Finance activities. Through these awards, Global Finance aims to highlight the vision, ambition and expertise of banks which stand out by making a clear difference for financial managers and treasurers within companies and organisations.

Belfius won the 'Best Trade Finance Provider' and 'Best Treasury & Cash Management Bank' awards for the second consecutive year - a first in Belgium - in recognition of the know-how of the teams within its Transaction Banking division, which was set up two years ago, and the relevance of its offer, which combines innovative solutions and local service.

State-of-the-art digital tools and personalised service

With staff of around one hundred, the Belfius Cash Management teams directly support the daily management of more than 17,000 clients (large companies and organisations in the public and social sectors). Their approach combines state-of-the-art and constantly evolving digital tools with human, local and personalised support. Their objective is to help treasurers optimally to manage all their financial flows and operations, both in Belgium and abroad.

Belfius

Composed of some sixty experts serving more than 1,500 corporate clients and sixty groups of trade customers, the Belfius Trade Finance team is supported by a network of international banks covering more than 120 countries. At the end of October, Belfius launched its new digital platform BE-Trade, a tool designed to facilitate the end-to-end processing of international trade operations and bank guarantees (domestic and international) for its clients.

Martine Klutz, Head of Transaction Banking at Belfius Bank: *“Despite the many challenges linked to the health crisis (teleworking, the blocking of documents and goods due to lockdowns abroad, and so on), once again this year our teams stood permanently at the side of companies and organisations of all sizes to offer them the best service and the solutions best adapted to their needs, thus supporting their activities and their development both in Belgium and beyond our borders.”*
